**This one-day class will give you the EPA-mandated training need for you and/or your employees to become Certified Renovators and comply with this new federal law.**

For more information, please visit [www.hbaglr.com](http://www.hbaglr.com)

**Attention: remodelers, painters, drywall installers, window installers, electricians, plumbers, carpenters, and anyone else who works on pre-1978 homes!**

Under new EPA rules that went into effect April 2010, contractors performing renovation, repair and painting projects that disturb lead-based paint in homes, child care facilities and schools built before 1978 must be certified and must follow specific work practices to minimize occupants' exposure to lead hazards.

All individuals performing activities that disturb painted surfaces must be certified renovators or have been trained by a certified renovator. A certified renovator must also be assigned to each renovation and perform all the EPA-mandated responsibilities of a certified renovator.

Fines for non-compliance are anticipated to be \$32,000 per occurrence.
